ATCO GAS OIL SERVICES LTD

Specialists in Oilfield Environmental Management & Spill Recovery Strategies

EXCELLENCE • INTEGRITY • INNOVATION

ENVIRONMENTAL STEWARDSHIP & WASTE MANAGEMENT

CORE REMEDIATION SERVICES

OILY SLUDGE TREATMENT

Advanced chemical and thermal processing to safely extract hydrocarbons from drilling waste and oily sludge, reducing environmental liability.

SOIL REMEDIATION

Comprehensive bioremediation and chemical stabilization programs to restore hydrocarbon-impacted soils to pristine ecological standards.

WASTE RECOVERY & RECYCLING

Implementation of structured recycling protocols for oilfield by-products, ensuring compliance with international environmental benchmarks.

STRICT ADHERENCE TO ISO 14001 & SOUTH SUDANESE ENVIRONMENTAL LAWS

"Deploying cutting-edge technology to restore and protect the natural ecosystems of East Africa's energy corridors."

OIL SPILL CLEANUP & EMERGENCY INTERVENTION

SPECIALIZED CLEANUP TOOLS & METHODS

MECHANICAL CONTAINMENT

Deployment of heavy-duty oil boom barriers and skimmers to arrest spill propagation across land and water bodies, preventing downstream contamination.

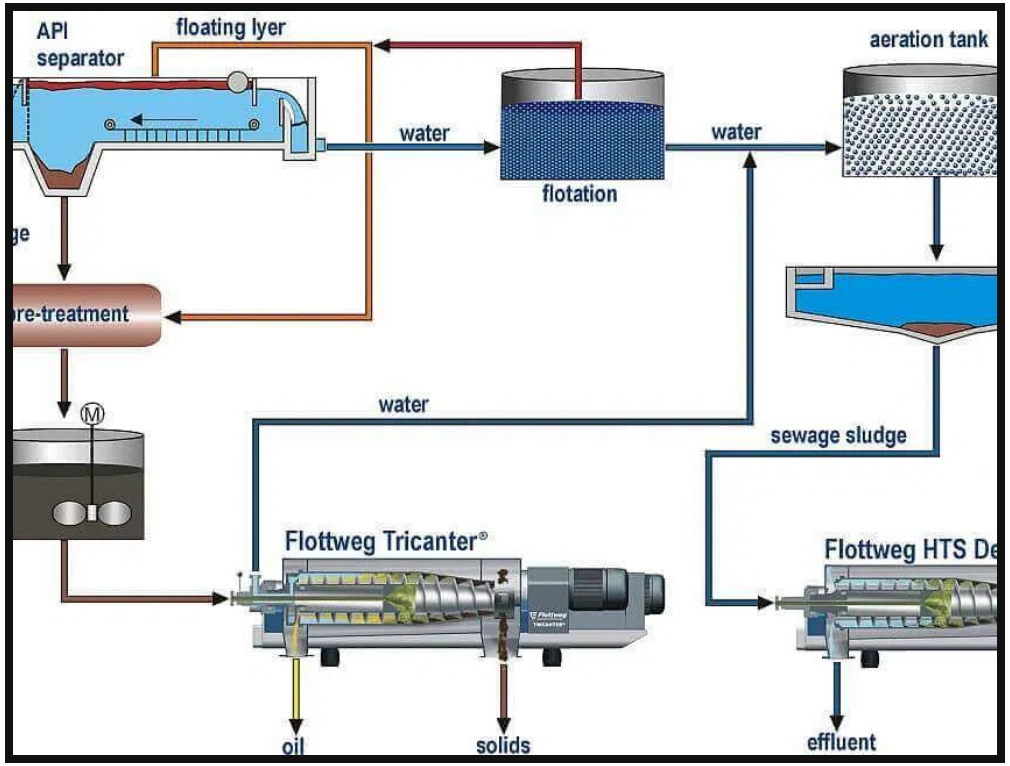
HYDROCARBON RECOVERY

Utilization of high-efficiency vacuum recovery units and skimmer pumps to extract free-phase crude oil from impacted terrain and drainage systems.

CHEMICAL NEUTRALIZATION

Application of specialized oil dispersants and neutralizing agents to mitigate toxic impact on local soil and hydrological structures.

OPERATIONAL PRIORITY: RAPID SPILL CONTAINMENT & ECOLOGICAL SAFETY



"ATCO's expertise lies in the rapid deployment of specialized recovery tools to minimize ecological damage in active oil fields."

FIELD RECOVERY STRATEGIES & ECOSYSTEM MANAGEMENT

ATCO implements comprehensive environmental management systems designed to rehabilitate oilfield ecosystems and restore operational viability in hydrocarbon-impacted zones.

SOIL STABILIZATION

GROUND INTEGRITY

Application of chemical and mechanical stabilization techniques to arrest soil erosion and prevent the migration of hazardous oil by-products into groundwater systems.

BIOREMEDIATION

ECOLOGICAL NEUTRALIZATION

Utilization of nutrient-enhanced microbial treatments to naturally degrade residual petroleum hydrocarbons, returning impacted land to pristine ecological standards.

ECOSYSTEM RESTORATION

FIELD REHABILITATION

Long-term management strategies focused on re-establishing native flora and fauna in decommissioned or damaged drilling sites through structured recovery programs.

OILFIELD INFRASTRUCTURE & ENGINEERING

CORE ENGINEERING SOLUTIONS

FACILITY CONSTRUCTION

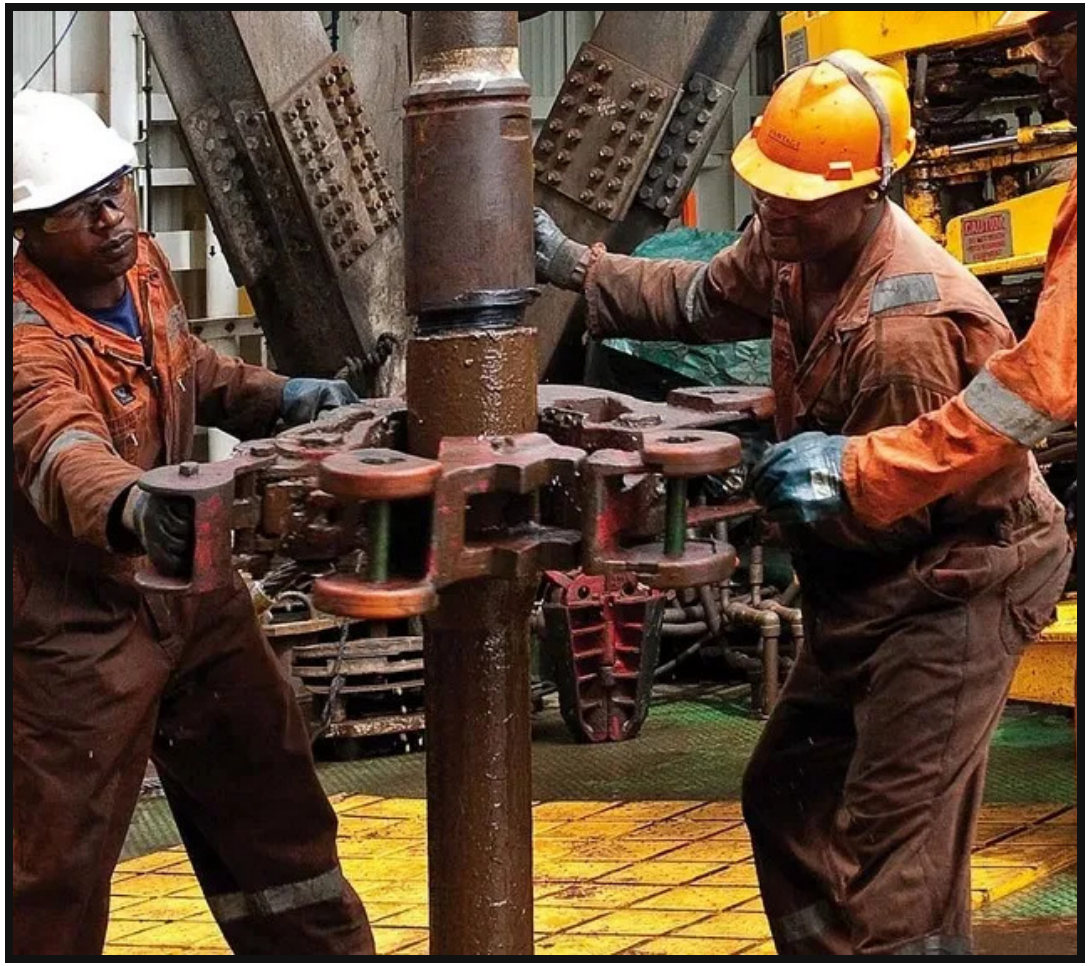
Expert erection, structural fabrication, and maintenance of industrial storage tanks, pipelines, and processing facilities designed for harsh oilfield environments.

WATER MANAGEMENT

Development and maintenance of vital water infrastructure, including deep wells, dams, and reservoirs to support remote inland operations.

ASSET INTEGRITY

Comprehensive structural restoration and maintenance programs aimed at extending the lifecycle of midstream and upstream capital assets.



UNCOMPROMISING HSE COMMITMENT

ATCO enforces a strict zero-harm culture that prioritizes the health and physical well-being of all personnel, subcontractors, and local communities.

ZERO-HARM CULTURE

Fostering an environment where safety is the primary responsibility of every employee, aiming for zero incidents across all project sites.

REGULATORY COMPLIANCE

Operations fully aligned with South Sudanese environmental legislation and international petroleum industry benchmarks (ISO/API).

RISK MITIGATION

Continuous hazard identification, rigorous safety audits, and rapid-response environmental emergency protocols to minimize operational risks.

"Excellence in safety is not just a goal; it is the foundation of our operational integrity and client trust."

GLOBAL STANDARDS COMPLIANCE:

ISO 14001 | ISO 45001 | API STANDARDS

PETROLEUM PRODUCTS SUPPLY & TRADING

RELIABLE ENERGY DISTRIBUTION

ATCO provides secure, continuous distribution and wholesale supply of essential petroleum derivatives across South Sudan and neighboring markets, ensuring energy security for critical operations.

- **HIGH-GRADE DIESEL**
- **PREMIUM PETROL**
- **LPG SOLUTIONS**
- **AVIATION FUELS**

"Ensuring uninterrupted fuel availability for heavy industrial transport fleets and power generation units in challenging inland locations."

OPERATIONAL FLEXIBILITY

Operating as a principal, authorized commission agent, or general energy supplier to meet complex procurement demands for remote drilling camps and industrial fleets.

SPECIALIZED EQUIPMENT & PROCUREMENT

GLOBAL SOURCING & SUPPLY

ATCO leverages an extensive international network to supply certified industrial inputs and heavy-duty hardware for complex oilfield operations.

LUBRICANTS & OILS

High-performance lubricating oils, specialized greases, and industrial process additives for heavy machinery.

PROCESS CHEMICALS

Certified drilling mud additives, environmental remediation agents, and industrial cleaning chemicals.

HEAVY-DUTY SPARES

Certified drilling spares, steel pipes, valves, anchors, and high-pressure fittings for rig operations.

SAFETY & PPE

Essential personal protective equipment (PPE) and safety hardware compliant with international standards.

Operational Advantage: Direct delivery of certified equipment to remote project sites, ensuring maximum asset uptime and full regulatory compliance.

THE ATCO ADVANTAGE

STRATEGIC VALUE PROPOSITION FOR ENERGY OPERATORS

INTEGRATED SOLUTIONS PROVIDER

Eliminating vendor multiplicity by offering end-to-end services spanning upstream environmental care to downstream fuel supply and infrastructure engineering.

LOCAL INSIGHT, GLOBAL STANDARDS

Combining deep familiarity with East African operational terrains with international benchmarks of corporate governance and technical execution.

AGILITY & RELIABILITY

Proven capability to mobilize specialized equipment, certified personnel, and vital supplies rapidly to remote and challenging inland oilfield locations.

PIONEERING ENVIRONMENTAL RECOVERY IN EAST AFRICA

ATCO Gas Oil Services Limited is dedicated to restoring and protecting the natural ecosystems of the oil fields through innovation, integrity, and uncompromising safety standards.
